

AKASH SINGH

Technical Consultant | Data & Integration Specialist

akash.singh_96@outlook.com | 7077100757 | [Linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY

Technical Consultant with 8+ years of experience designing and troubleshooting data integration solutions, REST APIs, and authentication protocols (SAML, SSO, OAuth) for enterprise SaaS platforms. Skilled in XML/JSON data mapping, SQL-based data quality and reporting, and cross-functional client engagement. Experienced in automating operational workflows via scripting and leveraging Generative AI tools to accelerate delivery. Comfortable working across data governance, integration architecture, and client-facing technical advisory.

PROFESSIONAL EXPERIENCE

Technical Consultant — **LinkedIn** 12/2021 – Present | Bengaluru, KA

- Lead technical onboarding for enterprise clients via API integrations, web scraping (Python), and XML/JSON job feed configurations, performing data mapping and transformation to ensure accuracy across systems.
- Troubleshoot REST API connectivity and integration issues by analyzing HAR logs, tracing JSON payloads, and debugging downstream data errors — ensuring high availability and reliability of client integrations.
- Hands-on with SAML, SSO, and OAuth authentication protocols, plus core networking troubleshooting, in client-facing technical discussions.
- Partner with CSMs, Account Directors, TSMs, and BDs to translate business requirements into technical specifications and drive successful, scalable rollouts.
- Leverage Generative AI (Claude Opus, GPT, Gemini CLI) within VS Code to automate routine data workflows and build internal tooling — applying practical AI deployment concepts to real client-facing use cases.
- Working knowledge of web technologies (HTML, CSS, JavaScript, HTTP, APIs) with hands-on technical troubleshooting experience

Software Engineer — **Mphasis** 05/2018 – 11/2021 | Bengaluru, KA

- Resolved L3 production incidents through root cause analysis (RCA) and code debugging (Java, C#/.NET), improving production server uptime by 20% and reducing MTTR.
- Built automation scripts (PowerShell ISE, OOP-based) for SQL Server operations and Splunk log monitoring, eliminating manual operational tasks — directly transferable to shell-scripting-based automation.
- Managed DEV/PROD deployment pipelines and performed database maintenance (purging, updates) on remote production servers.

SKILLS

Integration & Data: REST APIs, XML/JSON data mapping & transformation, SQL (queries, reporting, data quality), Data Governance concepts, FastAPI, Requests

Security & Auth: SAML, SSO, OAuth, network troubleshooting

Automation & Scripting: PowerShell ISE (OOP-based automation), Python (Pandas, NumPy, Pydantic, OpenCV), VS Code

AI & Data Science: Generative AI workflow automation (Claude, GPT, Gemini CLI), ML fundamentals, statistical modeling, model optimization basics

Monitoring & Support: Splunk, JIRA, Confluence, MS Teams, Slack, Gong

EDUCATION

Daksh Gurukul, IIT Guwahati — Data Science | 02/2025 – 03/2026

Introduction to Data Science, Machine Learning Fundamentals, Advanced Machine Learning

Kalinga Institute of Industrial Technology — B.Tech, Information Technology | 07/2014 – 04/2018
